SEATS AND STOOLS

With our wide selection of specialist and general use seats and stools you will always be able to find the right chair for you.

In the sampling or examination room our bioleader® stools can be color matched to your blood sampling chair or examination/gynecology couch. Other types of stools and seats can be equipped with a footrest or backrest.

Complement your laboratory installation with quality chairs and stools specifically designed for lab use, with some models made exclusively for Labelians. These seats offer different functions and are durable and resistant to cleaning products.

LAMPS

Basic companion to your blood drawing chair, examination or gynecology couch, the examination lamp comes in a variety of versions. Choose for a LED or halogen light that offers optimal illumination of the working area. A large choice of mounting accessories and mobile feet allow you to configure the lamp at will. Specialist lamps, such as a Wood's lamp, complete our lighting range.

MOBILE TROLLEYS

No sampling room is complete without a mobile trolley to keep your consumables close at hand. Select one of our many models that combine mobility and an optimized use of the available space.

Our popular Bobby trolleys offer a large storage capacity with a very small footprint; the trolley can be pivoted upon itself and moved with ease.

It is now also available with a low and a high drawer, allowing for the storage of blood collection tubes.

Several types of open or closed laboratory trolleys with stainless steel, plastic or resin shelves can be configured to your needs with additional shelves or drawers, side rails for supports, casters. They are sturdy, very mobile and easy to clean and disinfect.
