-80°C FREEZERS

U Range

medical
systems

Premium Line range for the preservation and storage at ultra low temperatures, down to -86°C of blood components, blood plasma, human cells and tissues, vaccines and other laboratory samples.

The U range is tropicalized, its -80°C freezers can operate up to +43°C of ambience.

Adapted for the users

Choice of languages

Choice of door opening direction when ordering
"Click and Open" mode:
opening by NFC badge

Space saving: put as many cryoboxes in a Bmedical U501 as in the main -80°C 700L

Cold safety

Efficient cold production with CASCADE cold technology

Cold homogeneity of +/-5°C over the entire range

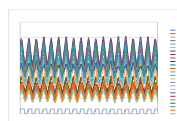

Protected compressor thanks to a removable filter without tools and an annual cleaning alert

2- years warranty

Parts, Labor and Travel and 5 Year Compressor Warranty

Art. U201

Sécurité des échantillons

"SAFE" mode: in case of breakage of a temperature probe, the device will continue to regulate the values previously defined and this in order to maintain operation

"TRACING" mode: for tracking events (door opening, alarms...)

"SECURITY" mode: secure your device by accessing the settings secured by code or badge

Compliance with standards

Class IIa Medical Device

Iso class 5 = compliant with use in White room

Complies with the new regulations F-GAS
